Site & Access Details

Access and Location Description

Located on Sibbald Range above North Branch. The site is on a broad flat topped knoll on a spur of the Sibbald Range that is on NE side of the North Branch valley. This site is easy to find because it is located in the first flat area north of the first summit from the beginning of this spur. In the saddle between the first summit (pt 1963) and the rest of the ridge. Look for a flat area adjacent to the flank of 1963. The point is located in a slab of exposed bedrock and is marked by a cairn and dazzle. NB it is possible to walk off this point using extensive scree to the head of Nth branch.

For each block of downloaded files there will be an earliest and latest file downloaded, plus the total number of files downloaded. Typically there will only be one download block per occupation. Occasionally a receiver will be downloaded several times during an occupation (eg during an extended semi-cGPS occupation). In this instance there will be multiple earliest, latest, and number of files downloaded. These are summarised in the comma delimited lists above.
